

Moin Tariq

Jinan, China

Email: sci.mointariq@gmail.com

LinkedIn: [linkedin.com/in/moin-t](https://www.linkedin.com/in/moin-tariq)

Education

Sep 2024 **Shandong University, Jinan, China.**

- Present
- M.S in Applied Mathematics
 - Thesis: Geographically Weighted ML-based Modelling of Urban Accessibility across Socio-Cultural and Environmental Contexts.
 - Grade: 91/100

Feb 2019 **International Islamic University, Islamabad, Pakistan.**

- Feb 2023
- B.S in Mathematics
 - Final Year Project: [Exploration Strategies in Tabular Q-Learning using Python](#).
 - Grade: 3.48/4.00

Publications

IJBDMGW 2025 **Analysing Climate Shifts: Patterns of Temperature and Precipitation in Pakistan.**

Moin Tariq

International Journal of Big Data Mining for Global Warming, 2025.

DOI: <https://doi.org/10.1142/S2630534824300033>

IJRESM 2023 **Mathematical Approach for Enhancing Audio Signal Quality: Theory, Insights, and Applications.**

Moin Tariq, Muhammad Irfan Haider Khan

International Journal of Research in Engineering, Science and Management.

Link: <https://journal.ijresm.com/index.php/ijresm/article/view/2901>

Research and Work Experience

Jul 2025 **Artificial Intelligence Engineer - Upwork Inc., Jinan, China.**

- Present
- As a top-rated professional, delivered 30+ freelance AI/ML and data science projects for clients across the U.S., Europe, and Asia, spanning predictive modeling, workflow automation, and applied analytics.
 - Integrated LLMs, REST APIs, and automated pipelines into production-ready client products, reducing manual workflow effort by 35% and shortening decision-making cycles for non-technical stakeholders.
 - Built scalable data pipelines, predictive models, and automated reporting dashboards using Python, SQL, FastAPI, and statistical methods, cutting reporting turnaround time by 40% across 12+ client engagements.

Sep 2024 **Research Assistant - AI for Digital Earth Group, Shandong University, Jinan, China.**

- Present
- Applied modern AI methods to extensive geospatial housing datasets to support social and environmental impact modeling.
 - Developed AI-driven climate models that surfaced actionable insights on temperature and precipitation patterns, contributing to a first-author publication in the International Journal of Big Data Mining for Global Warming.
 - Collaborated with cross-disciplinary teams across computer science, environmental science, and statistics on multiple projects.

- Oct 2025 **Lecturer - Shandong University of Science and Technology, Jinan, China.**
- August 2026
- Teach undergraduate courses in Linear Algebra, Probability & Statistics, and Introductory Computing & Programming.
 - Develop course materials, lesson plans, assignments, and examinations aligned with curriculum objectives.
 - Assess student performance and provide academic guidance to support learning and skill development.

Professional Projects

- PSX-MIP **PSX Market Intelligence Platform**
- Built a full-stack analytics platform using Python, FastAPI, SQL, PyTorch, LangChain, and REST APIs for Pakistan Stock Exchange company- and sector-level trend analysis, deep learning-based BUY/SELL/HOLD predictions, and AI agent-driven financial insights.
 - Link: <https://psx.veritrixlabs.com/>
- Roblox-AI **AI-Powered Roblox Market Intelligence Platform**
- Developed a full-stack gaming intelligence platform using Python, SQL, serverless APIs, custom scraping pipelines, revenue estimation models, and Gemini-powered automated reports to track Roblox games, engagement, and breakout trends.
 - Link: <https://liminadata.com/>
- RAG-Local Assistant **Modular Local RAG-Based Document QA System**
- Developed a modular local RAG system using Streamlit, Ollama, ChromaDB, semantic chunking, and local embeddings for document-based contextual question answering.
 - Link: https://github.com/moin-t/local_RAG_assistant
- PyGWML **PyGWML (Python Package)**
- Published an open-source Python package on PyPI for geographically weighted machine learning, enabling geospatial data modeling.
 - Link: <https://pypi.org/project/pygwml/>

Honors and Achievements

- 2024 Chinese Scholarship Council (CSC) High-Level Graduate Research Scholarship Award, Shandong University, Jinan, China.
- 2022 Grant to attend two days of the International Conference on Mathematical Modeling and Scientific Computing for Industrial Research at ASSMS, Lahore.
- 2021 Award of Participation “The Second International Workshop on Matrix Theory and Applications”, AKFA University Uzbekistan, 15-17 November.
- 2020 PM Pakistan’s Undegraduate Scholarship Award, International Islamic University, ISB.

Technical Skills

- ML PyTorch, Keras, TensorFlow, Matplotlib, NumPy, scikit-learn, Great Expectations, deep learning, NLP, MLflow
- AI & LLM OpenAI API, LangChain, LangGraph, agentic AI, RAG, prompt engineering, Ollama, LLMops
- RL Gymnasium, DQN, PPO, DPO, GRPO, A3C, SARSA, RLHF
- Backend Python, FastAPI, REST APIs, CI/CD, Airflow, Linux
- Platforms Docker, Git, Jupyter Notebook, Google Colab, ArcGIS, AWS Cloud
- Databases SQL, MySQL, PostgreSQL, NoSQL, Supabase

English Proficiency

IELTS 7.5
(CEFR C1)

Listening: 8.0 - C1, Reading: 7.0 - C1, Writing: 7.0 - C1, Speaking: 7.0 - C1

Certifications

Sep 2026 **AI Engineering Professional**

- International Business Machines Corporation (IBM)
- Credential: <https://www.credly.com/badges/9110a674-3201-4114-b021-807597d34ff7>

Aug 2026 **Machine Learning Engineer**

- Amazon Web Services (AWS)
- Credential: <https://www.credly.com/badges/9db3e274-4716-4550-8d43-991f175d3b12>

Aug 2025 **Data Scientist in Python,**

- DataCamp Inc.
- Credential: <https://bit.ly/dsdatacamp>
